PROFESSIONAL PROFILE

Currently employed as a Frontend Software Developer with Aspire Technology. I endeavour to always deliver high quality code, enjoy new challenges, am experienced in agile, have developing in C++ and developed frontend applications using **HTML5, CSS3, JQuery, Javascript, Bootstrap** and Perl. Prior to this employment I successfully completed a BSc. in Computer Science (honours) degree achieving First Class Honours in the process.

EMPLOYMENT HISTORY & WORK EXPERIENCE

Aspire Technology: Sandyford, Dublin 18

Position: Frontend Developer **February 2019 – Present**
Main Responsibilities

- Delivery of high quality, interactive frontend dashboards for both internal and external use. Examples include Voice and Data Quality Visualisations and Site Alarm Trends.
- Tools were developed within eclipse and VS Code IDE's using HTML5, CSS3, jQuery, JavaScript, Bootstrap and Perl and were done in an agile methodology environment.
- Delivery of software was performed using git and deployed either via Docker images or by logging onto internal or external servers (i.e. AWS) via PuTTY.
- Excellent communication skills were required working in a team environment, based both in Dublin and Belgrade. Often worked under pressure to deliver dashboards within a short timeframe.

Position: Software Engineer **August 2017 – January 2019**
Main Responsibilities

- Responsible for the delivery of high-quality software to Ericsson's RNC platform, communicating within a team in an agile environment, to deliver software releases on time.
- Executing test suites on software deliverables and upgrading / adding test suites if necessary, followed by documenting work undertaken and the impact of the changes.
- Duties included collaborating within a team, gathering requirements, implementation, testing, documenting and the delivery of software at set intervals.

Ericsson Ireland: Athlone, Co Westmeath

Position: Software Engineer Intern **February 2016 – August 2016**
Main Responsibilities

- Development of the BOAT tool, which is a Java, Swing and SQL based tool used by customer support to track customer service requests.

- Gathering requirements, coding, testing, documenting and the delivery of software at set intervals.
- Good communication skills were required working in a team environment, listening to and understanding the requirements needed by the customer support team. Often worked under pressure on challenging features to meet demanding deadlines.

O'Doherty's Audio and Video Productions: Clondalkin, Dublin 22

Position: VT Technician **September 2006 – August 2013**
Main Responsibilities

- Recording, archiving and selling of horse racing footage onto various types of media formats. Digitally editting footage to create montage clips or add graphics.
- Promoted to head of V.T. Department in 2008 where I developed and implemented new concepts for archiving the major race meetings onto broadcast formats over DVD.

EDUCATION & QUALIFICATIONS

Institute of Technology Tallaght, Dublin 24 **2013 – 2017**

BSc (Honours) in Computing (1.1 - First Class Honours)
Having successfully completed a 4 year degree, I am competent in the following **I.T. Skills**

- Capable of designing, developing and deploying websites using HTML5, CSS3, JavaScript, Angular JS and Twitter Bootstrap.
- Confident user of Java, C++, C# and SQL and NoSQL databases.
- Design, developing and testing Android applications.
- Competent user of Windows and Linux Operating Systems in system administration and command line interfaces.
- Design programs using object orientated systems analysis and design.
- Software quality and testing techniques such as Black and White Box testing and developing unit tests.

4th Year Project – Android Fuel Logger Application **2016 – 2017**

- A fuel and maintenance cost tracker application for Android phones built using Java, XML, NoSQL, JavaScript and numerous web API's.

INTERESTS & ACHIEVEMENTS

I have a keen interest in many sports, music and programming.
